EXPERIENCE

Master's Internship Software Development Engineer

🏢 Dassault Systèmes

📅 March 2025 – September 2025 📍 Vélizy-Villacoublay, France

- Prototyped a distributed system for unified management of logs and traces (OpenTelemetry, Jaeger, OpenSearch).
- Studied and experimented with architectures to support high data volumes.
- Adapted and optimized workflows for trace analysis and visualization.
- Worked closely with infrastructure and distributed computing teams.
Keywords: C++, Distributed Systems, Cloud, OpenTelemetry, Jaeger, OpenSearch, Grafana, Docker.

Assistant Developer Internship

🏢 UM6P

📅 April 2023 – June 2023 📍 Benguerir, Morocco

- Designed and implemented system intervention mechanisms.
- Collected detection data into a database.
- Developed a web application for real-time display of detections.
Keywords: C++, Python, Data Collection, Web Application, Real-time, Monitoring.

Web Developer Internship - Mail Management Application

🏢 Province of Rehamna

📅 April 2022 – May 2022 📍 Benguerir, Morocco

- Gathered and formalized requirements from various departments.
- Wrote and validated functional and detailed specifications.
- Modeled processes and data using Merise and UML methodologies.
- Deployed a centralized web solution for mail tracking.
- Conducted tests and adjustments to ensure solution quality and compliance.
Keywords: HTML, CSS, PHP, Laravel, Merise, UML.

EDUCATION

Master in Computer Science - IWOCS

🏢 Université Le Havre

📅 2023 – 2025 📍 Le Havre, France

- Web Engineering, Internet of Things, and Complex Systems.

Bachelor's Degree in Computer Science

🏢 La Rochelle Université

📅 2022 – 2023 📍 La Rochelle, France

- General program.

DUT - Computer Engineering

🏢 ENS Marrakech

📅 2020 – 2022 📍 Marrakech, Morocco

- Fundamental principles of software development and distributed systems.

PROJECTS

Secure Web API Application

- Developed a secure REST API supporting CRUD operations.
- Implemented JWT-based user authentication and route protection.
- Provided interactive API documentation using Swagger.
- **Keywords:** Node.js, Express.js, JWT, Swagger, MongoDB, REST.

Fullstack Product Management App

- Designed a full-stack web application with a RESTful backend and reactive frontend.
- Implemented real-time management of product data (CRUD operations).
- Deployed the application using Docker containers.
- **Keywords:** React.js, Node.js, Express.js, MongoDB, Docker, REST API.

Distributed MD5 Decryption with Docker Swarm

- Developed a distributed application for brute-force MD5 hash decryption.
- Orchestrated multiple worker services using Docker Swarm and task distribution via RabbitMQ.
- Built a real-time responsive web interface using React.js connected to a Node.js backend.
- **Keywords:** Node.js, Docker Swarm, React.js, RabbitMQ, Express.

SKILLS

- **Programming Languages:** C++, Java, HTML5, CSS, SQL, Oracle (PL/SQL), TypeScript, UML, LaTeX
- **Tools & Frameworks:** Git, Docker, React.js, Node.js, Express.js, Jaeger, Grafana, Anaconda Jupyter, Eclipse, PyCharm
- **Cloud Services:** MongoDB, OpenSearch, Distributed Infrastructure

LANGUAGES

- **English & French** (Level: C1)
- **Arabic** (Native Language)

VOLUNTEER WORK

Member of the BRIDGE ENS Club

- Organized integration events and participated in cultural and social life.

CERTIFICATIONS

- **Advanced React (Meta – Coursera)** – Certification obtained.
