EXPERIENCE

Master's Internship Software Development Engineer

🏢 Dassault Systèmes

📅 March 2025 – September 2025 📍 Vélizy-Villacoublay, France

- Prototyped a distributed system for unified management of logs and traces (OpenTelemetry, Jaeger, OpenSearch).
 - Studied and experimented with architectures to support high data volumes.
 - Adapted and optimized workflows for trace analysis and visualization.
 - Worked closely with infrastructure and distributed computing teams.
- Keywords:** C++, Distributed Systems, Cloud, OpenTelemetry, Jaeger, OpenSearch, Grafana, Docker.

Web Developer Internship – Real Estate Web Application

🏢 Zibro TECH

📅 July 2024 – September 2024 📍 Le Havre, France

- Developed a secure REST API handling CRUD operations.
 - Implemented user authentication and authorization with JWT and OAuth 2.0 (Passport.js), protecting sensitive routes.
 - Delivered interactive API documentation with Swagger.
- Keywords:** Node.js, Express.js, JWT, OAuth 2.0, Passport.js, Swagger, MongoDB, REST.

Assistant Developer Internship

🏢 UM6P

📅 April 2023 – June 2023 📍 Benguerir, Morocco

- Designed and implemented system intervention mechanisms.
 - Collected detection data and stored it in a database.
 - Developed a web application for real-time display of detections.
- Keywords:** C++, Python, Data Collection, Web Application, Real-time, Monitoring.

Web Developer Internship - Mail Management Application

🏢 Province of Rehamna

📅 April 2022 – May 2022 📍 Benguerir, Morocco

- Gathered and formalized requirements from various departments.
 - Wrote and validated functional and detailed specifications.
 - Modeled processes and data using Merise and UML methodologies.
 - Deployed a centralized web solution for mail tracking.
 - Conducted tests and adjustments to ensure solution quality and compliance.
- Keywords:** HTML, CSS, PHP, Laravel, Merise, UML.

EDUCATION

Master in Computer Science - IWOCS

🏢 Université Le Havre

📅 2023 – 2025 📍 Le Havre, France

- Web Engineering, Internet of Things, and Complex Systems.

Bachelor's Degree in Computer Science

🏢 La Rochelle Université

📅 2022 – 2023 📍 La Rochelle, France

- General program.

PROJECTS

Tax Dashboard – Frontend & Visualization

- Developed the user interface to display tax rates by department and municipality.
- Implemented a React/TypeScript service to fetch and normalize data from a Symfony REST API.
- Created interactive charts (time series, scatter plots, pie charts) with D3.js.
- **Keywords:** React, Vite, D3.js, TypeScript, REST API, Data Visualization.

Distributed MD5 Decryption with Docker Swarm

- Developed a distributed application for brute-force MD5 hash decryption.
- Orchestrated multiple worker services using Docker Swarm and task distribution via RabbitMQ.
- Built a real-time responsive web interface using React.js connected to a Node.js backend.
- **Keywords:** Node.js, Docker Swarm, React.js, RabbitMQ, Express.

Development of a Smart Contract for a Dutch Ascending Auction

- Designed and implemented a Smart Contract to manage a Dutch ascending auction.
 - Automated the sale of items through an electronic document.
 - Implemented programmable price decrements at fixed intervals and enforced a reserve price.
- Keywords:** Solidity, Smart Contract, Blockchain, Ethereum.

SKILLS

- **Programming Languages:** C++, Java, HTML5, CSS, SQL, Oracle (PL/SQL), TypeScript, UML, LaTeX
- **Tools & Frameworks:** Git, Docker, React.js, Node.js, Express.js, Jaeger, Grafana, Anaconda Jupyter, Eclipse, PyCharm
- **Cloud Services:** MongoDB, OpenSearch, Distributed Infrastructure
- **Machine Learning:** regression, classification, clustering, neural networks (TensorFlow & Keras)

LANGUAGES

- English & French (Level: C1)
- Arabic (Native Language)

VOLUNTEER WORK

Member of the BRIDGE ENS Club

- Organized integration events and participated in cultural and social life.

CERTIFICATIONS

- **Advanced React (Meta – Coursera)** – Certification obtained.
